

3 IN 1: PROCESS ORCHESTRATION, E-FORMS, E-TASKS

What is Netgrif?

Netgrif is an innovative BPMS (Business Process Management System) platform that enables rapid modeling, automation, and optimization of business processes without the need for complex programming.

🕒 10× faster than classic software development.

⚡ 3× faster than other low-code solutions.

1 Comprehensive Solution

- **Process Orchestration** – Real-time workflow management and automation.
- **E-Forms** – Dynamic digital forms without the need for programming.
- **E-Tasks** – Intelligent tasks with automated assignment and escalation.
- **Integration with existing systems.**

3 Usage Examples

- Automate approval processes.
- Incident and ticket management.
- Supply chain optimization.
- Document digitization and management.

2 Key Benefits

- **Dynamic Automation** – Instantly adjust processes in response to changing needs.
- **Flexibility & Scalability** – Rapidly adapt to different scenarios without lengthy development.
- **Easy Process Modeling** – Visualization using BPMN and Petri Nets.
- **Integrated Solution** – Easy integration with ERP, CRM, ITSM and other systems.
- **Transparency and Control** – Real-time process status overview, reporting and auditability.

HOW TO GET STARTED WITH THE NETGRIF SOLUTION

PoC (Proof of Concept)

1 Total price = 10.000 EUR

- **Services** 10.000 EUR
- **Licences** 0 EUR – EE (Enterprise Edition) for 3 months/ 10 users.

3 Key benefits

- We will develop two workflow prototypes and provide expertise transfer so you can better understand and effectively use our platform.

2 Scope & duration

- Duration **4 weeks**.
- Scope - As part of this offer, our experts will provide you with 15 business days of professional services, during which we will deliver: implementation, DevOps, analytics and testing services.

MvP (Minimum Viable Product)

1 Total price = 20.000 EUR

- **Services** 20.000 EUR
- **Licenses** 0 EUR – EE (Enterprise Edition) for 6 months/ 10 users.

3 Key benefits

- We will develop four workflow prototypes, deploying one of the workflows in a test environment. We also provide knowledge transfer that will allow you to better understand and effectively use the potential of our platform.

2 Scope & duration

- Duration **6 weeks**.
- Scope - As part of this offer, our experts will provide you with 30 business days of professional services, during which we will deliver: implementation, DevOps, analytics services, and testing services.
